* Denotes Color-Stable Automotive Films warrantied against excessive color change

FXtreme Ceramic Series is a proprietary, non-metalized automotive film that is designed specifically to reject heat and block 99% of harmful UV rays. This film excels at keeping vehicles cooler and reduces the damaging effects of the sun.

FXtreme Blue 70% Ceramic film will give your customers the highest level of comfort in their cars. As with our FXtreme Series, this film will help keep vehicles cooler and reduces the damaging effects of the sun on vehicle interiors.

RejectorFX 70% film is a great alternative to Ceramic films. Its low metal re-enforced properties and UV stabilizers make for a color-stable film that will not fade, has great optical clarity, and is signal friendly to vehicle electronics/

CarbonFX Series provides true color-stability with a deep, black color. UV inhibitors are utilized at multiple stages in manufacturing, ensuring the dyes will retain their color for years. The black color matches with any factory windows

Ultra Series is a deep dyed 2-ply, 1.5 Mil polyester film in which UV inhibitors are utilized at multiple stages of the manufacturing process, ensuring the dyes will retain their color for years to come.

Vintage Series is a deep dyed 2-ply, 1.5 Mil polyester film that will provide minimal color fade over time and will hold up beautifully in any climate. A tried-and-true film with a rich, black tone.

Prime Series is a deep dyed 2-ply, 1.5 Mil polyester film that will provide minimal color fade over time and will hold up beautifully in any climate. This film will improve installation time and increase productivity.

Classic Series is a dyed single-ply, 1.0 Mil polyester that is made with today's technology. Therefore, it's not your normal run-of-the-mill 1-ply automotive film.
